Two Trouser Suit or Overcoat at This Upstairs Shop

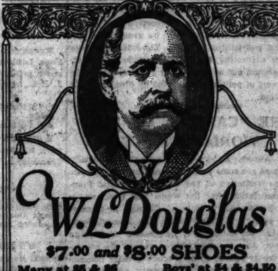

Thave been proving to hundreds of men and young men in the past few weeks that they can get the best suits and overcoats in Chicago at 30% less cost than ground floor stores charge for the same quality of merchandise by patronizing this upstairs shop.

I carry a complete stock of the finest grade in one or two trouser suits and overcoats-made by America's leading manufacturers and bearing their labels. My garments are all wool, latest style, and are guaranteed to fit and wear. My location on the 3d floor of the North American Bldg., State and Monroe Streets, and inexpensive fixtures, low rent, and my knowledge of the clothing business are the reasons I can sell 30% cheaper. Make me prove it. A call is all I ask. You can wait on yourself.

LET U. S. GIVE MID-WEST A FAIR DEAL.

Charles Donnelly, president of the Northern Pacific railroad, tells the National Industrial Traffic league that manufacturers and other shippers throughout this middle western region are in danger of being financially destroyed if the interestate commerce commission does not allow the railroads to arrange their tariffs in such manner as to compete with shipping through the Panama canal. The situation certainly is menacing. As railroad and water rates now stand, manufacturers and other reconstructors situated on or near the coasts can

ship their goods between Atlantic, Gulf, and Pacific ports and adjacent markets so much cheaper than Chicago manufacturers, for instance, can ship by rall to San Francisco that the middle western producer is heavily handleapped. That handleap has been developed by the Panama canal, for the construction of which the middle west is being taxed proportionately to the coasts. Thus we find our middle western business men paying, perforce, for something which threatens their ruin.

That is distinctly unjust. The government by

Dr. Chancy investigated granges and oracine juice for the midmorning lunch of undermourished school children as a substitute for milk. The conclusion was that orange juice as a midmorning lunch was even better than a glass of milk. The reasons were these:

On the negative side: Milk was filling, and, having taken a glass of it in the midmorning, the child cometimes did not have an appetite for the noon meal. The stomach needs a rest after a glass of milk, and the period between the lunch and the noon meal was toe short.

In the second place, some of the good expected from a glass of milk is due to the supposed antiscorbutic properties of milk. Except in the rather brief season when cows are grasing all day on young green grass their milk contains very little antiscorbutic power.

On the positive side: Orange julce is the antiscorbutie. fine antiscorbutio.

The British consul general here sent instructions to the consuls and vice consuls throughout the republic effect the situation is serious and that lives of foreigners are in danger.

The instructions said that an anti-American outbreak is feared and that British subjects would be included, as the Mexicans would not be able to discriminate between Americans and English.

This action was taken when Sir Lienel Carden; the British minister here; urged President Huerta to resign.

A Challenge to Young Men.

YOUNG MEN: Many of your elders call you spendthrifts. They say you have no notion of the real value of a dollar.

This criticism, which all young men hear, cannot be laughed away. It is a challenge to youth.

An account in our Savings Department is one good way of meeting such a challenge.

It raises you in the estimation of your elders and gives you a secure position with your employer.

of any Garage Man-

They stated that 80% of all repairs on moving parts came from one causelack of proper lubrication.

And used-car merchants told us, that in the resale of a \$1,500 car, for example it is common for an owner to receive \$150 less because of this neglect.

Cause of Neglect

Your motor as a rule does not suffer. It is easy to oil. It is the Hard wearing chassis bearings that cause most repairs. For, with old greasing systems, these parts have been hard to reach. And you never could be sure that the lubricant ever actually reached the bearing surface.

During the last few years, however, most motor car manufacturers have ely changed their system of lubrication. Grease and oil cups were discarded wholesale.

Now most cars are equipped with the Alemite High Pressure Lubricating System. With this system, every wearing point of your chassis is equipped with a hollow fitting as shown below. You snap on the coupling with a simple quarter turn and the cross pin locks it.

Turn the compressor handle and it literally shoots the lubricant into the heart of every bearing - under 500 pounds pressure. Old rust, dust, grease and grit are forced out. You know the work is done thoroughly. High pressure insures this.

When to Use

If Alemite is on your car, be sure to use it at least every 500 miles. That's why the manufacturer has given it to you to save repairs! For repair bills of \$100 to \$300 after 6,000 miles of driving, due to neglect in proper lubrication, are common. Any dealer will confirm this. So you can't overlook its importance.

Check over your Alemite fittings and see that none is missing. If you do not know where each fitting is located, ask your dealer for a diagram.

If Alemite is not on your car, your dealer will install it complete \$5 to \$20, according to make and model of your car. (Fords \$3.99).

There are cheaper systems than Alemite. But most motor car engineers deem it unwise to economize here. Their judgment should be good precedent for you. See your dealer today.

"Among the stores who live up to their advertised claims," said he, "is Ogilvie and Jacobs."

"When Ogilvie and Jacobs advertise a garment as particularly suitable for any condition, you may depend upon it that the garment is exactly as advertised. Their store is not merely a clothing store; it is a 'service station' for men who want to know all about the art of being well-dressed."

And so it goes. Everywhere our patrons tell their friends about us, and the friends become patrons, in an ever-increasing chain. It is a source of great satisfaction to us that our patrons take it upon them-selves to do this.

MATCH IN WEIGHT

De Paul's tootbal team and that of the Notre Dame Reserves will be a close match in weight, at least, in their game tomorrow at De Paul field.

The gridiron contest will be the big athletic feature of the silver jubiles celebration at the school, when the archbishop of Chicago and other church dignitaries will dedicate the new science hall on the campus.

A study of the lineups submitted by the coaches shows Notre Dame's line averages 176 pounds, while that of De Paul's is 175. The back field of the north side school averages 149½ pounds, while that of the Hooster college squad is 151½ pounds. The total average weight of Notre Dame is 167 pounds and De Paul is 165.

Lafayette, Ind., Nov. 15.—[Special.]

—A soggy field, the result of a steady downfall of rain last night, did not prevent the Purdue varsity football team from taking part in a dummy defensive scrimmage with the second string eleven here this afternoon.

The scrubs executed Purple plays with a fair degree of success. The first team forward wall, weakened by the absence of Capt. Claypool, Wellman, and Meyer, was unable to cope with the style of attack offered by the reserve eleven. The first team backfield, made up of Jacobs, Carlson, Spradling and Harmeson drilled to stop the Northwestern aerial attack.

The varsity line consisted of the following players:

Cunningham, center; Slewart and Anderson, spark and Winston, ends.

NEW YORK .- [Special Correspondnce.]—The poor old fat man, who as matter of fact may be neither old nothing at all, has come in of late for a great many suggestions as to what he may and may not do. He mustn't do this, and he mustn't do that; he should avoid too much of something or other, and is recommended to adopt something else. Some day we shouldn't he surprised to receive a visit from the united forces of the stout men among our readers, all wearing checked waistcoats, piaid suits, horizontally striped shirts, light gray overzontally striped shirts, light gray over-coats, and all the rest of the things we have warned them not to wear. No-body likes a lot of "don'ts" governing his life, and so we shouldn't blame corpulent men for going on strike. However, there are some more meek souls who are glad to know just what garments will make them look more like a size 38, and to these seekers after slenderness we offer one more suggestion. Keeping the coat buttone makes quite a difference in the effect of bulkiness. An open coat flops about

A Graphic Record of Goodyear Value Look over this simple chart, and you will see that for years Goodyear Tire prices have consistently been kept below the average price level for all

You will see also that Goodyear Tires today are priced less than they were in 1914—ten years ago. On the other hand, during this time Goodyear Tires have been steadily improved. Long-staple cotton, the Goodyear patented group-ply construction, the improved All-Weather Tread make Goodyear Tires 100% better now than then.

Yet this 100% better Goodyear Tire sells today for 39% less than the Goodyear of 1914 and 45% less than the Goodyear of 1920.

Now is this time to buy Goodyear Tires. They are the biggest value ever offered you.

Must We Cancel Her War Debts to Save Europe?

The war debts of the European Allies to the United States amount to \$11,328,066,747, and the billion and a half dollars of interest overdue on these debts brings this total to nearly thirteen billion dollars—about \$116 to every man, woman, and child under the nearly thirteen billion dollars—about \$116 to every man, woman, and child under the Stars and Stripes. Secretary Hughes has stipulated that the proposed committee of international financial experts to investigate Germany's resources must not bring up the question of inter-allied debts. On the other hand, France insists that the allied debts are at the root of the issue and there is a body of public opinion in that country that evidently expects America to cancel its debt to France. In THE LITERARY DIGEST this week, you will get a good impression of the way France, Britain, and Belgium look upon their debts to this country, and American public opinion upon America's stake in the reparations dispute. Other striking news-features in the November 17th DIGEST are:

Dehearsting the Tammany Tiger Read what leading newspapers say about the jolt given the political aspirations of William Randolph Hearst in the New York State election.

Organizing a Union for Bank Clerks Labor leaders out to unionize the white-collar orkers in New York banks.

The Klan's Challenge and the Reply

Advertising never jerks—it pulls. Q That advertising which shoots across the sky like a falling star—spectacular while it lasts—is soon forgotten. Q But it is the even pull, perhaps gentle at first, that steadily increases day by day, year by year, until it becomes an irresist-ible power. Q Adequate and responsive circulation plays a major part in the creation of this irresistible power of advertising, and the constantly increasing buying efficiency of its immense reader audience makes possible such records as these for the Evening American:

Only Chicago newspaper in 1921 to show gain in advertising over 1920.

Gained more display advertising in 1922 than any other Chicago newspaper.

Gained during the first nine months of 1923, 25.2% in local display advertising over the same period of 1922, which was nearly double the percentage of gain of the next evening newspaper.

Any responsible retailer or manufacturer can utilize the irresistible force of advertising by drawing upon the eager responsiveness of Evening American readers

Even before the little red schoolhouse disappeared from this region, Marquette had founded a reputation for fair dealing and a high quality cement. So that during the past thirty years it has been Marquette's privilege to participate in the fireproof construc-tion of our public school buildings. In the past two years there have been over forty schools constructed with the help of safe, durable concrete madefrom Marquette Cement. When you use cement, or when cement is used for you, look for the name Marquette on every sack. There is a Marquette Dealer near you. You will know him by the sign he displays.

Municipal Bonds for Safe Investment

The American community can and does pay its obliga-tions. Backed by productive farms, and fostered by trade and industry, it has earned this well-known reputation through its thousands of energetic taxpaying citizens. Municipal Bonds, secured by taxes paid by the entire community, are in the first rank of safe investments. We recommend the following:

NOT SUBJECT TO REDEMPTION BEFORE MATURITY

The Chicago and North Western Railway Company serves the important territory between the Great Lakes and the Missouri River Valley, and westerly thereof its lines extend into the states of South Dakota, Nebraska and Wyoming. The lines of the Company connect such important centers as Chicago, Illinois; Milwaukee and Madison, Wisconsin; Des Moines, Sioux City and Council Bluffs, Iowa; Omaha and Lincoln, Nebraska; and Pierre, South Dakota. At Council Bluffs, the Company's lines connect with those of the Union Pacific system, thus forming an important link in a through passenger route as far as the Pacific coast. "The Chicago and North Western Railway Com

"For the year ending December 31, 1922, the income of the Company applicable to the payment of rentals and interest on funded debt amounted to \$20,952,664.02, while the rental payments, interest on funded debt and other deductions for that year (other than Federal income taxes and dividends) amounted to \$11,448,172.65. For the first nine months of the present fiscal year (1923) the income of the Company applicable to the payment of rentals and interest on funded debt, amounted to \$14,217,600.71, while the total accruals for rental payments, interest on funded debt and other deductions (other than Federal income taxes and dividends) for the same period amounted to \$3,591,096.62.

"In addition to the Bonds reserved for refunding as above stated, bonds may be issued under the First and Refunding Mortgage for the construction or acquisition of railroads, additions and betterments, rolling stock and floating equipment to become subject to the mortgage. The Company has the right in the manner provided in the mortgage to reserve or to issue bonds to refund the indebtedness of other companies which it may acquire through purchase, consolidation or merger and whose properties shall become subject to the lien of the First and Refunding Mortgage.

THE UNDERSIGNED WILL RECEIVE SUBSCRIPTIONS FOR THE ABOVE BONDS, SUBJECT TO ALLOTMENT, AT 931/4% AND ACCRUED INTEREST TO DATE OF DELIVERY, YIELDING ABOUT 5.35%.

The undersigned reserve the right to close the subscription at any time without notice, to reject any application, to allot a smaller amount than applied for and to make allotments in their uncontrolled discretion.

The above bonds are offered if, when and as issued and received by the undersigned and subject to the approval by the Interstate Commerce Commission and any other public authorities that may be necessary of the issuance of the bonds and their sale to the undersigned and to the approval by their counsel of all legal proceedings in connection with the issuance thereof. Temporary bonds or interim receipts will be delivered against payment in New York funds for bonds allotted, which temporary bonds or interim receipts will be exchangeable for engraved bonds when prepared.
